

Densified Beech Logs

The octagonal briquette is made from **100% natural beech wood** with no barks which is exclusively sourced by our own French sawmills, **PEFC certified**.

Due to the dry and clean materials, the briquettes have a **sanitary advantage** compare to standard logs. Moreover, with briquettes it is quicker to set up the oven temperature and cleaner for the smoke extraction system.

The perfect fuel for those who cook in **wood-fired oven** !

Microbiological analysis provided by **COFRAC** accredited laboratory

Perfect for Pizza ovens

**Normandy
Briquettes**

Identification Data Sheet

Species: **Beech (Fagus sylvatica)**

Composition: **Compacted clean dry saw dust and shavings**

Dimensions: **240x95mm**

Weight: **2kg**

Packaging: **Box of 6 pieces/12 kg or Plastic film of 5 pieces/10kg**

Superior Calorific Value (as received): **app. 5000 kWh/ton (app. 18000 J/g)**

Density > **1050 kg/m³**

Humidity < **8%**

Ash < **0,5%**

Additives: **None**
